

## 5075

## **Wheel Loader**

The rugged champion.

The Kramer 5075 is a compact and maneuverable 5-series wheel loader. The machine impresses with its dynamic all-wheel drive, high payload and low dead weight. With the specially shaped loading system and the P-kinematics, unloading from the second row is possible without any problems. The cabin, designed for functionality, enables safe operation of the most important work functions with the aid of a backlit keypad.

Automatic load stabilizer: The optional automatic load stabilizer ensures optimum comfort for man and machine.

Long loading system: An application-oriented lifting height due to optionally extended loading system.

Flexible use: A bucket volume from 0.75 m³ to 1.1 m³ depending on material density.

Exhaust gas stage V: Exhaust gas aftertreatment is provided by DOC and DPF.

Maneuverability: The 2 x 40° steering angle means minimum turning radius and maneuverability in the smallest area.
