

YANMAR

Vi027-7

MINI EXCAVATOR

Operating weight

2 650 kg (Canopy) / 2 745 kg (Cabin)

Engine

3TNV80F - ZXKBVA

Digging force (arm)

16.5 / 13.6 kN (long arm)

Digging force (bucket)

21.4 kN

THE URBAN ALLY FOR ANY JOBSITE

PERFORMANCE

Achieves digging force up to 21.4 kN (bucket) and 13,6 kN on long arm. The traction force reaches 23.5 kN in 1st speed for unmatched ground engagement.

OPERATOR SPACE

The spacious cabin features a large door, large windows, and a wide display for optimal comfort.

POWER

Delivers 18.4 kW at 2400 rpm, powered by a new-generation electronically controlled engine designed to maximize fuel efficiency. Integrated Eco Mode, Auto Idle (standard) and Auto Stop (option) functions further optimize performance.

COMPACTNESS

Features a zero tail swing design, enabling smooth maneuvering in the tightest spaces without compromising stability — and delivering added safety and peace of mind on every jobsite.

VERSATILITY

Enables quick attachment changes with optimized front stability for efficient working. Supports main connection systems, allowing work with a wide range of attachments.

THE URBAN ALLY FOR ANY JOBSITE

-  Compact power meets zero-tail precision.
-  The Vi027-7 operates safely close to buildings, sidewalks and traffic—perfect for urban foundations, landscaping, and confined worksites.
-  Combining narrow undercarriage, excellent visibility, and VIPPs hydraulic smoothness, this ultra-compact powerhouse delivers fast, simultaneous movements even while traveling—without compromising on power.

SMALL FRAME, FULL POWER

DESIGNED FOR DENSE ENVIRONMENTS

Purpose-built for demanding **urban applications**, the Vi027-7 combines compact dimensions with **confident performance on congested jobsites**.

With an overall width of just 1,500 mm including cab and rubber tracks and a transport weight of 2,565 kg, it easily accesses restricted areas while maintaining stability and control.

The wide boom swing range (75° left / 60° right) further enhances manoeuvrability, allowing operators to **work safely around pedestrians and obstacles in busy environments**.

The machine is well suited to urban construction, tight landscaping environments and small building or renovation projects where space is limited and awareness of surroundings is essential.

ZERO-TAIL SWING

Its true zero tail swing configuration enables operators to work safely alongside buildings, sidewalks and traffic, drastically limiting the risk of contact or damage.

LIGHT ON THE GROUND, STRONG AT WORK

Thanks to its compact structure and optimised weight distribution, the Vi027-7 delivers **impressive stability** while remaining **gentle on sensitive surfaces**. Low ground pressure allows confident operation on soft terrain, landscaped areas and renovation sites where surface protection is critical. Whether working on slopes, trenching for utilities or navigating finished environments, the machine combines **agility** with dependable **control** for safe, efficient operation.

COMPACT SIZE, FULL-SCALE PERFORMANCE

Despite its reduced footprint, the Vi027-7 delivers digging and hydraulic performance that meets demanding jobsite expectations. With breakout force up to **21.4 kN** and a maximum digging reach of 4.8m, it tackles **deep excavations and tough materials** across urban construction, landscaping and small-scale building projects.

TRANSPORT-READY MOBILITY

The Vi027 is perfect for professionals who move between jobsites daily and rental companies seeking maximum fleet flexibility. With the machine, quick coupler and two-bucket standard attachment package **staying within the 3.5-tonne transport regulation**, operators can use standard trailers and private vehicles without requiring commercial licenses. Four integrated tie-down points on the lower frame ensure fast, secure loading and unloading. This transport efficiency translates directly into lower operating costs per job, reduced downtime between sites, and simplified logistics—making the Vi027 an **ideal choice for contractors and rental fleets maximizing utilization across multiple projects**.

OPERATOR-FOCUSED DESIGN

COMFORT AND VISIBILITY FOR ALL-DAY PRODUCTIVITY

The spacious cabin features a **wide 425mm entrance** for easy access, **large windows** providing excellent visibility of the work area, and a **4.3" LCD display**. Ergonomic controls and generous interior space reduce operator fatigue during long shifts, allowing sustained focus and precision throughout the day. Clear sightlines and intuitive layout keep operators confident and in control, even in demanding urban environments.

RESPONSIVE PERFORMANCE AT YOUR COMMAND

Powered by a **proven 3TNV80F Stage V engine** and paired with the ViPPS hydraulic system operating at 210 bar maximum pressure, the machine ensures fast cycle times and controlled movements. The double variable displacement piston pump (2 x 32.4 l/min) provides responsive hydraulics for **smooth, precise operations** even during intensive tasks—combining speed, accuracy and efficiency in a compact package.

INSTANT CONFIDENCE, FROM DAY ONE

Designed with simplicity in mind, the controls are **intuitive enough for any operator to get productive** from the very first shift. And for those who need an extra hand, Yanmar Scan delivers **instant access to key machine information** – just scan the QR code on the machine with your smartphone. Essential settings, maintenance guidance, and operational tips: all at your fingertips, on the spot. A smart companion to the official manual, helping every operator hit the ground running.

SIMPLIFIED MAINTENANCE, MAXIMUM UPTIME

MAINTENANCE MADE EFFORTLESS

Wide-opening covers give immediate **ground-level access to all critical components** – engine, filters, battery, radiator, hydraulic fluid – no tools, no gymnastics. Daily checks take minutes, not hours, keeping downtime where it belongs: at zero. Less time under the hood means more time on the job.

OPTIMIZED SERVICE SCHEDULE, MAXIMUM MACHINE AVAILABILITY

With a first service between 50 and 80 hours, followed by extended maintenance intervals, **servicing is predictable and easy to plan**. Engine oil and main filters are replaced every 500 hours, fuel filters every 250 hours, and coolant only every 2,000 hours – reducing workshop visits and operating costs. Clearly structured service points and long replacement intervals mean less downtime, lower total cost of ownership, and more productive hours on site.

AN ENGINE YOU CAN COUNT ON - REPLACEMENT PARTS READILY AVAILABLE

Yanmar engines are world-renowned for their **robustness, fuel efficiency, and longevity** – built to keep running shift after shift, year after year. When a part is needed, Yanmar's extensive dealer network ensures fast availability across the region, so you're never left waiting. Genuine Yanmar parts, sourced locally: because reliability doesn't stop at the engine.

Maximum pressure	210 bar	PTO	Theoretical data at 2400 rpm		 Oil flow decreases as the pressure increases
			Pressure	Flow	
1 gear pump	2 X 32.4 l/min		PTO1	0 – 170 bar	
		PTO2	0 – 180 bar	33.6 – 21.1 l/min	

[PERFORMANCE]

Travel speed	2.5 / 4.4 km/h
Rotation speed	9.7 rpm
Digging force (arm)	16.5 kN / 13.6 kN with long arm
Digging force (bucket)	21.4 kN
Traction force	23.5 kN / 12.1 kN*
Gradeability	30°
Noise level (2000/14/CE & 2005/88/CE)	LwA: dBA/LpA: dBA

[UNDERCARRIAGE]

Number of slide shoe plate	1
Number of bottom rollers	3
Track tensioning system	Grease adjuster

[CAPACITIES]

Fuel tank	39 l
Coolant	4,1 l
Engine oil	3,4 l (max)
Hydraulic circuit (including hydraulic tank)	49 l
Hydraulic tank	32 l

[MAINTENANCE FREQUENCY]

[Change engine oil and filter: 50 hours (1st) / 500 hours (2nd)] [Change fuel filter: 50 h (1st) / 250 h (2nd)]
 [Change hydraulic oil: 50 h (1st) / 500 h (2nd)] [Change hydraulic filter: 50 h (1st) / 500h (2nd)]
 [Change cooling fluid: 2000 hours]

EQUIPMENT

[STANDARD EQUIPMENT]

PERFORMANCE

3TNV80F Yanmar EU compliant stage V diesel engine | Direct injection | VIPPS Hydraulic system (VIPPS Progressive 3 Pump System) | AUX1 proportional hydraulic line with control on joystick | Automatic kick down (AKD) travel motors (std.) | ECO mode I Auto-idling system | Long arm (1400 mm)

COMFORT & EASE OF USE

4.3" LCD Interface | Standard mechanical suspension seat, adjustable, vinyl coat (canopy) or textile coat (cabin) | Adjustable wrist support | Foot rests | Wide travel pedals | Windshield in 2 parts (retractable upper part) | Double sliding right side window | Transparent upper front part | Wipers | Windshield washer | Automatic ceiling lamp | 2xUSB charging ports | Storage boxes | Lockable document storage | Cup holder | heating (cabin) | Quick connectors on battery terminal

SAFETY AND DURABILITY

Rear view camera on main LCD display | Safety valves on blade, boom, and arm cylinder with integrated overload warning | Handrails | Safety lever | Safety belt | Hammer for evacuation | Travel beep | Anchor points | Blade cylinder supply hose into two parts | Hoses protected by abrasion resistant sleeves & internal routing | Locking covers |

MISCELLANEOUS

Fuel gauge | Tool kit | Grease pump | Fuel filter with indication light water separator in display.

[OPTIONAL EQUIPMENT]

EQUIPMENT AND PERFORMANCE

Special paint | Additional counterweight | 2nd auxiliary circuit with proportional control | 1/2 circuit | Bio oil | 2 LED head lights on the front of the machine | flat face hydraulic quick connector AUX1 and AUX2 | Independent Powertilt supply line | 1 LED light + beacon to the rear of the machine | Auto stop.

COMFORT AND EASE OF USE

Premium mechanical suspension seat heated (opt.) | Radio FM/ DAB | Centralised greasing | Smart phone holder

SECURITY AND DURABILITY

GPS track unit (TU700I Anti-theft device (Key/Keypad/ LCD pincode | Travel alarm white noise | Smart Assist Remote (SAR) Telematics | FOPS | front operator protection for cabin

[ATTACHMENTS]

Yanmar gives you the attachment that fit your needs and match the safety standards in force in your country: mechanical quick coupler, hydraulic quick coupler, ditching bucket, swinging bucket, backhoe bucket, hydraulic breaker...
